

Jarin Tasnim

+13062501205 | Jarin.tasnim20@usask.ca | [ResearchGate Profile](#)

Education

M.Sc in Computer Science at University of Saskatchewan, **CGPA: 3.90**

B.Sc in Software Engineering at Shahjalal University of Science and Technology(SUST), **CGPA: 3.74**

Publications

Tasnim, J., Chakraborti, D. & Roy, C.,. (2023). *How does quality deviate in stable releases by backporting?* The paper was published in the A* conference **International Conference on Software Engineering (ICSE)**, NIER 2023: [Paper Link](#)

-Synthesized the relationship between workplace cognitive stressors and backport decision-making efficiency using Chi-square and effect size analyses.

Tasnim, J., Chakraborti, D. & Roy, C.,. (2023). *An Insight into the Technical Debt-Fix Trade Off in Software Backporting.* Published in **International Conference on Collaborative Advances in Software and Computing (CASCON) 2023**: [Paper Link](#)

-Apache projects accumulate more total technical debt, while less active Python and Eclipse projects tend to have higher technical debt density, making maintenance harder per code change.

Tasnim, J. An Empirical Study of the Polarization of Consumers during COVID-19 Pandemic. **Research published in the Springer LNNS series**: [Paper Link](#). This paper is related to my undergrad thesis focused on Human Computer Interaction(HCI).-Used regression analysis in SPSS to identify key predictors of consumer turnover and cognitive behaviour during Covid-19.

Thesis (Masters):

Tasnim, J. (2024). A Comprehensive Study on Quality Aspects and Industry Perspective in Backporting. M.Sc. thesis, University of Saskatchewan. [Paper Link](#).

Explored the relationship between workplace stressors and decision-making efficiency & software quality using experimental methods and SPSS-based analysis (GLM, ANOVA).

Skills

Programming/Scripting Languages: Java, Python, C, SQL, Javascript (React, Angular)

Tools: CoreNLP, Scikit-Learn, Tensorflow, Keras.

Experience

Research Assistant ([University of Saskatchewan](#)): [January 2022 - February 2025]

I actively collaborated with open-source developers and stakeholders from **three distinct** software ecosystems (**Ansible, Kibana, and ElasticSearch**) to reflect the **business-centric perspective** and support of software backporting, under the supervision of [Dr. Chanchal Roy](#), and [Dr. Kevin Schnider](#) at Software Research Lab (SRLab). This project is a joint venture between [Software Research Lab \(SRLab\)](#) and [Apache Software Foundation](#).

I actively collaborate to generate and compare detailed gap analysis, impact analysis, and SWOT reports across software releases.

I gained experience in data cleaning, preprocessing, and pattern finding using multiple Python scripts such as Pandas, NumPy, and PyGithub.

Teaching Assistant ([University of Saskatchewan](#)): [January 2022 - April 2024]

Created inclusive and accessible instructional materials tailored to diverse learner needs for undergrad students.

Supported academic success through one-on-one mentoring, office hours, and formative assessment strategies.

Developed CS focused responsive course materials incorporating content and perspectives.

Software Engineer ([Dynamic Solution Innovators](#)): [January 2021 - December 2021]

Collaborated primarily in [IPEMIS](#), developed for the Directorate of Primary Education (DPE), Bangladesh and funded by [UNICEF](#). This service is currently being used by more than **20 million** registered students, covering the entire primary

education system of Bangladesh.

Research Assistant ([Shahjalal University of Science and Technology](#))

[January

2020 - December 2020]

Working under [Dr. Forhad Rabbi](#), where my core responsibility is to work on the ongoing research projects.

Maintained HCI focused undergrad thesis groups and also assisted to prepare research proposals for grants.

Honors and Awards:

~~[Vice President \(Social\)](#) at Computer Science Graduate Council (CSGC), University of Saskatchewan~~

Best Research Award: Computer Science Research Fest 2023, University of Saskatchewan

Best Reviewer Award: The International Conference on Software Maintenance and Evolution (ICSME)
